**FIFTH SET OF PENNSYLVANIA CYBER CHARTER SCHOOL
RESPONSES TO RFP QUESTIONS**

1.   On page 7 of the RFP for K-12 Online Curriculum and Student Learning Management System, the RFP states that separate and distinct proposals are requested. The program we are proposing works together (curriculum and LMS). The program cannot be uncoupled/sold separately. Can we provide one proposal (binder) with tabs separating our response for A. Online Curriculum and B. Learning Management System?

Answer: Yes.

2.   Please clarify whether requirement 3 on Page 7 of the RFP for K-12 Online Curriculum and Student Learning Management System applies to all grade levels (K-12) or just elementary (K-5).

Answer: All grade levels.

3.   Please provide additional information for what is meant by requirement 7 on page 9 of the RFP for K-12 Online Curriculum and Student Learning Management System.

Answer: PA Cyber would like the availability of placement tests for each grade level/content area to properly determine student placement into a course(s).

4.   Please provide additional information/clarification with regards to the reference 'e' in requirement 18 on page 9 of the RFP for K-12 Online Curriculum and Student Learning Management System.

Answer: Please disregard the information in quotations. The requirement is simply looking for the availability of answer keys for all assignment/test questions for our teachers.

5.   Please provide additional information as to what is needed/required with regards to a bulk grading feature (item 43 on page 11 of the RFP for K-12 Online Curriculum and Student Learning Management System).

Answer: Our teachers oftentimes have over 100 students on their roster and we would like the ability to grade a specific question on an assignment/test at the same time for all students, as opposed to opening each exam individually. This also applies to providing an overall grade to all students in the gradebook at the same time.

6. Please clarify what is meant by item 5 on page 13 of the RFP for K-12 Online Curriculum and Student Learning Management System under Program/Course Navigation.

Answer: **Offline materials include textbooks, workbooks, supplies, and/or any other item needed by the student to complete the daily work within the curriculum.**
